BRIEF PLANTING AND CULTURAL NOTES

Plant peonies in deep well drained soil with buds or eyes 2 inches deep. This is one of the most important parts of planting peonies. If planted too deep, they will not bloom satisfactorily. Bone meal is recommended as the best fertilizer; if other prepared fertilizer is used, select one with low nitrogen. Plant in fall only. To spray peonies for blight, use Parzate, and start when the plants start coming through ground, and then once a week or after rains for at least 3 times or until buds are fairly well developed.

SHIPPING NOTICE

Peonies shipped anytime from about the 1st of September until about November 15th. Iris and Day Lilies from 1st of July until freezing weather. Full 3 to 5 eye, or larger peony plants. State inspected. All prices Postpaid except where noted otherwise. Wholesale prices on request. Owing to weather and planting conditions beyond my control, I can in no case be responsible for more than the purchase price of plants.
